

# Pyramidal Arborvitae

Fast growing, narrow pyramidal evergreen with bright green, soft-textured foliage. An ideal choice for a hedge or screen. Minimal shearing required to maintain its neat shape.

Reaches 12-25 feet tall; 3-6 feet wide.

Full to Partial Sun

Follow a regular watering schedule during the first growing season to establish a deep, extensive root system. Requires less water once established; water regularly in extreme heat.

*Landscape Supply Inc.*

**Feed with a general purpose fertilizer before new growth begins in spring. For a tidy, neat appearance, shear annually to shape.**

- Do plant in full sun, best form and health are achieved in full sun.
- Do provide adequate drainage and avoid “clay bowls” that are notorious for holding water and predisposing plants to the compost heap.

- Don't plant where exposed to high winter winds.
- Don't plant in high deer traffic areas; white cedar and its cultivars are favored by deer in the winter months.
