

Green Mountain Boxwood

A vigorous evergreen shrub with bright green foliage that retains good color throughout winter. The upright, naturally cone-shaped habit makes it an excellent candidate for topiary forms, and a striking container or formal garden accent. Use in mass plantings to create either a free-form or a sculpted hedge.

Moderate growing; reaches 5 feet tall, 3 feet wide.

Partial to full sun

Water regularly - weekly, or more often in extreme heat or containers.

- Do use sharp, clean tools when pruning; ragged stems and foliage from dull tools leaves your plants open to various pest and disease.
- Do provide adequate drainage and avoid “clay bowls” that are notorious for holding water and predisposing plants to the compost heap.
- Don’t forget to apply antitranspirant/antidessicant in late fall. This is especially important to new plantings or exposed sites.
- Don’t fertilize or prune too late in the season; we want new growth to harden off before the season first frost.
