

## Snow Fountains Cherry Tree

Small strongly weeping tree is covered with snow white flowers in spring, creating a fountain of single white blooms. The small dark green leaves turn golden to orange in fall. Fruit is small and black, but sparsely produced.

Reaches 10-15 feet tall; 15-20 feet wide.

Full Sun

Low trickle base to the root zone every other day for the first 2 weeks. Weaning to every 3<sup>rd</sup> week 1x per month; supplementing during times of drought.

- Do provide organic matter when backfilling rootball, adequate mulch layer and protection from hot afternoon sun.
- Do use sharp, clean tools when pruning; ragged stems and branches from dull tools leaves your plants open to various pest and disease.
- Don't plant too deep; pay attention to the root flare in relation to the surrounding grade. A tree too high or deep will result in a tree under stress.
- Don't neglect to thin the interior over time; as a member of the rose family, cherry thrives with good air circulation to interior structure.
