

# Bobo Hydrangea

This hydrangea is engulfed by large white flowers in summer. The flowers are held upright on strong stems, and continue to grow and lengthen as they bloom. As blooms age, they turn pink. It is compact and dwarf in habit, and the flowers cover every inch of the plant right down to the ground.

Reaches 2-3 feet high and 3-4 feet wide.

Partial Sun to Full Sun

Requires regular watering.

- Do prune regularly; this will result in a much sturdier framework, capable of holding up the massive flower heads.
- Do prune in late fall or winter. This will avoid cutting off next season's blooms before they've had a chance.
- Don't forget to provide adequate drainage and avoid "clay bowls" that are notorious for holding water and predisposing plants to the compost heap.
- Don't prune plants too early or you run the risk of cutting off future blooms.
