

# Limelight Hydrangea

Huge, football-shaped flowers open in an elegant celadon green that looks fresh and clean in summer's heat. The blooms age to an array of pink, red, and burgundy which persists through frost for months of irresistible flowers. You can use 'Limelight' hydrangea just about any way you can imagine: as a showy flowering hedge, to screen off air conditioners, as an attention-getting specimen, in containers, flower gardens, or anywhere around your home. A long-time favorite of professional florists, it also makes an excellent cut flower, fresh or dried.

Reaches 6-8 feet tall and wide.

Partial Sun to Full Sun

Requires regular watering.

- Do prune regularly; this will result in a much sturdier framework, capable of holding up the massive flower heads.
- Do prune in late fall or winter. This will avoid cutting off next season's blooms before they've had a chance.

- Don't forget to provide adequate drainage and avoid "clay bowls" that are notorious for holding water and predisposing plants to the compost heap.
- Don't prune plants too early or you run the risk of cutting off future blooms.
