

Autumn Blaze Maple

An improved hybrid with brilliant, long lasting, orange-red fall color, an upright, uniform branching habit and a rapid growth rate. Will tolerate wet soils with good drainage. An excellent lawn, park or street tree.

Fast growing; reaches 50-60 feet tall; 40 feet wide.

Full sun

Water regularly - weekly, or more often in extreme heat.

- Do apply an annual fertilizer in spring, following manufacturers' recommendations.
- Don't forget to do an annual inspection looking for any deadwood or damage seasonally.
- Do apply mulch to a depth of 3-4", your mulch ring should be the same diameter as the canopy above. Avoid piling the mulch around the trunk and creating the unfortunate "mulch volcano".
- Don't plant too deep; pay attention to the root flare in relation to the surrounding grade. A tree too high or deep will result in a tree under stress.
