

# Swamp White Oak

Swamp white oak is a striking tree with attractive peeling bark, especially on young trees. The lustrous, lobed leaves have a two-tone appearance, dark green on top with a silvery-white underside. Fall color is an orange-gold to yellow in mid-autumn. An excellent shade tree for any landscape.

Reaches 50-60 feet high and wide.

Full sun

**Prune oaks in the dormant season to avoid attracting beetles that may carry oak wilt.**

- Do use sharp, clean tools when pruning; ragged stems and branches from dull tools leaves your plants open to various pest and disease.
- Do apply mulch to a depth of 3-4", your mulch ring should be the same diameter as the canopy above. Avoid piling the mulch around the trunk and creating the unfortunate "mulch volcano".

- Don't plant too deep; pay attention to the root flare in relation to the surrounding grade. A tree too high or deep will result in a tree under stress.
- Don't forget to do an annual inspection looking for any deadwood or damage seasonally.
